Subject: Mathematics

Date:

Chapter:4-Data Handling and Presentation

I. Choose the correct option:

1. Which of the following steps comes first in organising data?
a) Collecting data b) Drawing a graph c) Interpreting data d) Classifying data
2. What does the height of a bar in a bar graph show?
a) Frequency or value b) Total length c) Shape of the data d) Color of the data
3. A pictograph uses which of the following to represent data?
a) Bars b) Pictures or symbols c) lines d) points
4. What is data?
a) A single number b) A bar graph c) A bar graph d) A collection of information
5. **Assertion (A):** Primary data are more reliable than secondary data.
Reason (R): Primary data are collected directly by the investigator for a specific purpose.
a) Both A and R are true and R is the correct explanation of A.
b) Both A and R are true but R is not the correct explanation of A.
c) A is true but R is false.
d) A is false but R is true.

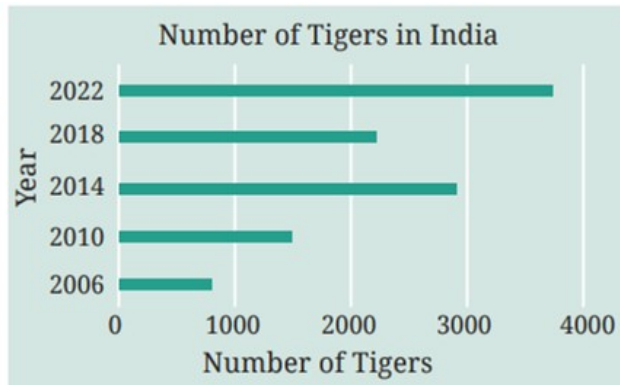

II. Fill in the blanks:

1. A _____ represents data through pictures of objects.
2. An observation occurring seven times in a data is recorded as _____, using tally marks.
3. A _____ is a collection of numbers gathered to give some information.
4. Bar graphs are used to represent _____ data.
5. Each symbol in a pictograph must represent a _____ quantity.
6. Data collected by an investigator for the first time is called _____ data.

III. Answer the following questions:

1. If you wanted to visually represent the data of the heights of the tallest persons in each class in your school, would you use a graph with vertical bars or horizontal bars? Why?
2. The number of tigers in India went down drastically between 1900 and 1970. Project Tiger was launched in 1973 to track and protect tigers in India. Starting in 2006, the exact number of tigers in India was tracked. Shagufta and Divya looked up information about the number of tigers in India between 2006 and 2022 in 4year intervals. They prepared a frequency table for this data and a bar graph to present this data, but there are a few mistakes in the graph. Can you find those mistakes and fix them?

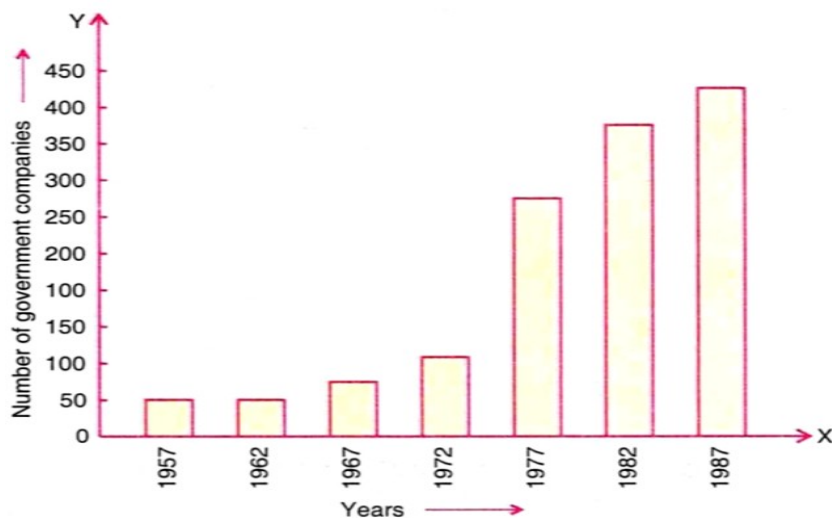

Year	Number of Tigers (approx.)
2006	1400
2010	1700
2014	2200
2018	3000
2022	3700

3. a) If you were making a table of the longest rivers on each continent and their lengths, would you prefer to use a bar graph with vertical bars or with horizontal bars? Why?

b) Which continents have the longest rivers? _____

4. Read the following bar graph and answer the following questions:

- What is the information given by the bar graph? _____
- State each of the following whether true or false.
 - The number of government companies in 1957 is that of 1987 is 1 : 9. _____
 - The number of government companies have decreased over the year 1957 to 1983. _____

5. Mr. Rudra made a pictograph given below to show the number of cars washed at a car washing station during three days of a week.

Days	Number of cars washed	One  = 15 cars
Friday	   	
Saturday	        	
Sunday	      	

From the pictograph, find that:

- How many cars were washed on
(i) Friday? _____ (ii) Saturday? _____ (iii) Sunday? _____
- On which day the maximum number of cars were washed at the station?
- On which day the minimum number of cars were washed at the station?
- How many more cars were washed on Saturday than on Friday?

6.

Rakesh is playing with a dice. He threw the dice 40 times and noted the outcomes as follows.

1, 2, 1, 5, 3, 5, 5, 3, 2, 2, 1, 6, 6, 6, 4, 6, 3, 5, 2, 3, 3, 5, 4, 1, 5, 5, 2, 4, 5, 5, 2, 4, 1, 6, 6, 1, 5, 6, 1, 5.

Prepare a table using tally marks.

*

7. **Read the following text carefully and answer the questions that follow:**

Favorite Subjects in a Class

In a class of 25 students, the favorite subjects are recorded as follows:

8 students like Mathematics

6 students like Science

5 students like English

4 students like Social Studies

2 students like Art

- a. How many students like Science? _____
- b. Which subject is the least favorite among the students? _____
- c. What is the total number of students who like Mathematics or English? _____
- d. Represent the data using a bar graph.
